

Cascade Scatter™ Geneva Series

Elevate and customize a scatter experience with the Cascade Scatter™ Geneva urns and scattering Geneva Keepsakes. The innovative, patent-pending Cascade Scatter™ closure provides many options to commemorate a loved one; the multi-functional and decorative lid design allows cremated remains to be scattered gently and slowly, granting the remains to be dispersed by loved ones during a scattering ceremony and permits multiple scatter locations. The Geneva Keepsakes allow family members of any age to participate in scattering and can be utilized as a memorial to hold remains and soil from each scatter location. Constructed of stainless steel with two beautiful finishes and many distinct, decorative lid designs, this series is also ideal as a permanent tribute placed in a home. Enhance with custom personalization.
